

NICSTEL 1020 N / NE

NICSTEL 1020 N / NE are PC Base Low Cost VoIP Specialized Device.

It allows better voice quality than headset-mic when you use PC base soft phone.

❑ **High quality Voice-over-IP calls**

By using powerful Digital Signal Processor, the USB VoIP Series is able to deliver an echo free, full duplex audio through the Internet.

❑ **No external power required**

The power of the USB VoIP Series is provided by the USB port of your PC, therefore, you do not need to have an additional power adapter for your USB VoIP devices.

❑ **Drivers support and upgrades for Microsoft OS**

The drivers of the USB VoIP Series are provided by Microsoft Windows, thus no additional drivers are required. Drivers are currently available in Microsoft Windows 98 /98SE /ME /2000 and XP .

❑ **Plug-and-Play, Grab-and-Go**

With its compact size and USB interface, the USB VoIP Series is your ultimate travel companion. You can take it with you wherever you go. Just plug in any computer with an available USB port and an Internet connection, along with voice chat or ITSP (Internet Telephony Service Provider, such as Net2Phone, Dialpad, Mediaring, etc.) applications on it, and you are ready to make long distance calls to any phone in the world or global call to any PC.
