

KIRK 3040 Handset - Unique Quality for Professional Use

We have a passion for quality

Quality in terms of voice quality - no noise, no jitter, no delays to disturb conversations and quality in terms of the physical handset: One of the lowest return rates in the industry speaks for itself. The high quality is constantly tested. During development phase the handsets are tested numerous times. The functionalities, the software as well as the finished handsets, are tested at our own testing facilities and at field tests. Furthermore, the handsets are subject to third party laboratory test, including drop tests and stress tests. KIRK handsets have a long lifetime. With the carefully developed migration plans built into our communication solutions, KIRK handsets will "survive" changing interface technologies in the systems. Return on investment is guaranteed.
